

covid-19 update document 22.03.2020

business continuity activations

In light of the ongoing concerns regarding Covid-19, Veriphy has activated its standard business continuity plans.

Our priority is to ensure the health and safety of our employees, customers and other stakeholders, as well as the continuity of our services. We are also complying with government and public health organisation guidance in order to keep everyone safe.

Our response plans

We have initiated a response plan comprising:

- Communication plan established, with regular newsletter updates
- Information hub established at: <https://veriphy.com/2020/03/25/covid-19-supporting-our-clients/>
- Remote working capabilities in place for all staff
- All site visits cancelled (to our premises and to supplier/customer premises)

Commitment to staff and customers

We have successfully tested our ability to deliver our services remotely. We have provided employees with the tools necessary to deliver their duties from a remote location.

Should you have any questions or require any further information at this stage then please speak to richard.devine@veriphy.co.uk 07935 958323
